SUMMARY OF INFORMATION

The site is the inside of a large structure. It is warm and browns, and reds are predominant colors. The ceiling ranges in height from 8-10 feet to 20-30 feet. The changes in height are horizontal levels and each change involves an angle. Lights are affixed to the highest level. There is flat carpeting on the floor similar to commercial-grade. It is dark red or reddish-brown in color. There are many interconnecting metal bars present.

The purpose of this place is to efficiently accommodate a number of people. The interior was similar to/reminiscent of a public building like a museum, convention hall, theater or arena.
